## LETTER TO THE MANAGEMENT

---

---

September 5, 2017

Dear Sir/Madam:

Help! Help! We're being invaded!

I warned you months ago about aliens being on the property and nobody believed me. I requested that armed guards be placed at the entrances to all our homes and none appeared.

Well, now we have a new problem: Sasquatch! I have multiple reports from the other residents about this creature lurking around their enclosures. It has been seen mostly around the Bobcat Rehab enclosure. Cooper says it visits about once a day, Mrs. Claws remembers seeing it, and she said that Spirit Feather used to challenge it. Joseph said when the Sasquatch visited him he was shot!

I am so nervous that I have to sleep all day long so I can stay on guard all night. I've been eating grass to settle my stomach and may have to send out for some of that pink stuff. When I go swimming I make sure to make a lot of splashy noises to scare it away just in case it's lurking in the trees somewhere.

We should all be concerned; the Sasquatch is learning our ways very quickly and is trying to blend in. From the picture below you can see that it already managed to steal and drive one of our golf carts!

OH NO! I heard a noise on the walkway! Where are the police? Where is my armed guard? Where is security? Oh, I have to go lay down ... I have a headache.

Sincerely,

Andy Tiger  
(Sent via Lori D., Secretary to the Cats)
