

**FROM THE LAW FIRM OF CATZ, KATS,
MOREKATZ AND A RAT**

March 24, 2018

Dear Sir/Madam:

Approximately one year ago (02.07.17) we contacted you regarding a temporary resident at your facility named Nova, and how she had single-handedly brought the American economy to a halt, and destroyed the internet.

Once again, we find it necessary to contact you – this time regarding a resident named Shamrock. The number of complaints grew by leaps and bounds yesterday when she received a stuffed squirrel as a play toy.

Apparently she has not only succeeded in bringing the economy to a halt, but satellites in space have gone completely off course trying to keep up with the demand of the people wanting to watch this baby bobcat.

Air traffic controllers are struggling to track incoming and outgoing flights; televisions keep pixelating; the weather channel has no idea whether it's raining or snowing or what the temperature is; and the International Space Station seems to have gone off course.

Last year we found it necessary to close our office to watch Nova and determine if the complaints were valid, at great cost to us.

This year, we have had an unnatural number of employees taking immediate FMLA time due to "family emergencies."

Going forward, we hereby request that you notify our office whenever you accept a new resident so that we can plan appropriately.

Thank you for your attention.

Sincerely,

I. Wanta Hugger, Partner
Catz, Kats, Morekatz and a Rat
